Preface

This book features a wealth of origami suitable for happy events and occasions of celebration. Some are good for keeping by your side and decorating your room with your own ideas.

You will find it delightful to choose colorful paper and think about the combination, imagining the reactions of those who see the work or those who receive it as a present. You will feel a little thrill when you get to work on it. A warm smile will break over your face when you hear someone says, "Please show me how to make it?" or "Thank you. I copied your model."

It is also a good diversion for you to fold paper for your own purpose. I sincerely hope that this book will brighten your life and give you a happy smile.

Chapter 1

Cards and Letter Holders

Simplicity is important.

The essential characteristic of origami may be in the act of folding paper. In applying origami to cards and letter holders, I think simple folding is best. Those who open cards and letter holders have to unfold the completed works and fold them again. It means that they have to experience for themselves what the author has gone through. If the works are complicated, it will be difficult for them to reconstruct the origami and they may be at a loss what to do.

The folding procedure must be simple. To the works you may add something that suggests the season or the object. It depends on your idea. You may write or stick what you like on them. Introduced in this chapter, there are several such ideas. Those who open the cards and letter holders will be completely satisfied with the mechanics before being struck with admiration. They surely want to try to fold them by themselves.

Letter Holder 1

(Pictured on page 7)

Appropriate paper size:
21 x 30 cm (8 1/2 x 12") or
18 x 26 cm (7 x 10")

Step 1 is the point of this work. You may decide the folding width and angle freely as you like. It is possible to start with the edge folded as shown on the right page.

①

The width and angle are up to you.

②

Let the edges meet.

Fold at right angle.
The width is up to you.

③

⑤

④

The center overlaps about
1 cm (1/2").

Stick a seal before
mailing it.

⑥

Insert the flaps.

⑦

⑧

◆ Add one fold ◆

①'

Fold the edge slightly.

②'

③'

④'

⑤'

⑥'

Fold so that the center overlaps about 1 cm and insert.

You may write your address on the thin white space.

Letter Holder 2

(Pictured on page 7)

① Make creases.

②

Appropriate paper size:
21 x 30 cm (8 1/2 x 12") or
18 x 26 cm (7 x 10")

③

Fold on the creases.

⑤

④

⑥

⑦ Insert tips marked ★ into pockets.

⑧

Letter Holder 3

(Pictured on page 7)

① Make creases.

Appropriate paper size:
21 x 30 cm (8 1/2 x 12") or
18 x 26 cm (7 x 10")

②

③

⑤ Inside reverse fold.

④

Inside reverse fold.

⑥

⑦

Open.

⑧ Fold on creases and insert into pockets.

⑨

⑧'

[Thick paper]

Fold in between.

⑨'

Letter Holder 4

(Pictured on page 7)

Appropriate paper size:
21 x 30 cm (8 1/2 x 12") or
18 x 26 cm (7 x 10")

①

②

③

Fold ● to ●.

④

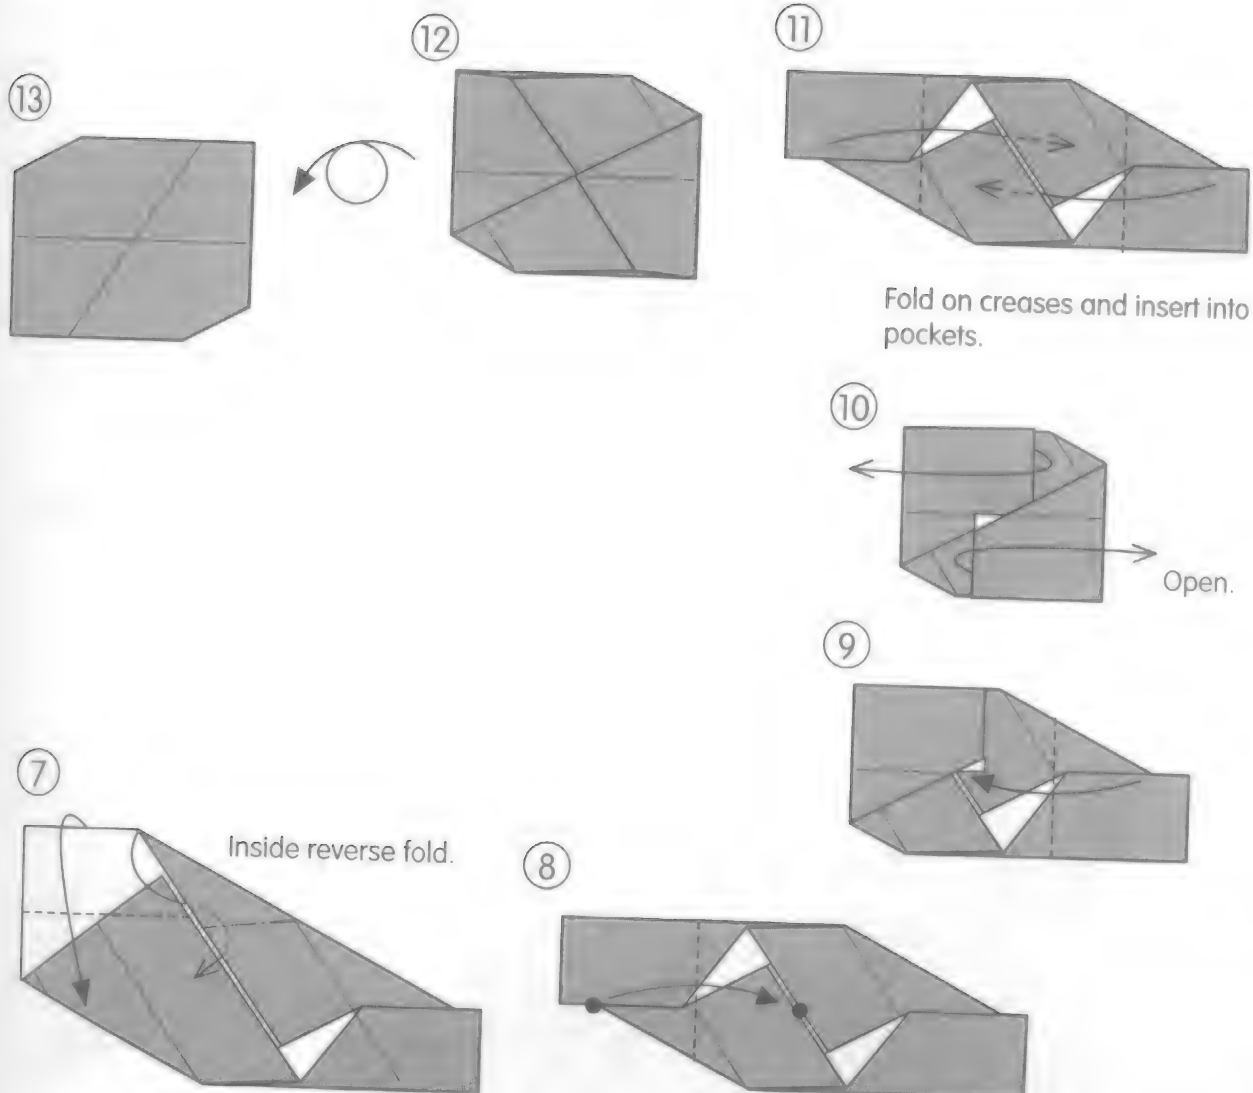

⑤

⑥

Letter Holder 5

(Pictured on page 7)

Enjoy variations by changing steps ⑧ and ⑩.

Appropriate paper size:
21 x 30 cm (8 1/2 x 12") or
18 x 26 cm (7 x 10")

Fold along the
center line.

[A]

[B]

From step ⑦ on page 30.

Card 1

(Pictured on page 10)

Appropriate paper size:
21 x 30 cm (8 1/2 x 12") or
18 x 26 cm (7 x 10")

①

②

③

④

Open after making creases.

⑥

Fold on the center line.

⑤

⑦

⑧

⑨

Open.

Make your original card by writing your messages in the inside and outside.

Open

You may write your message directly in the inside or insert a card.

⑩

⑪

⑫

⑬

⑭

Fold at Δ and fold upper flap as far as ∇ .

⑩

Make creases as shown.

⑪

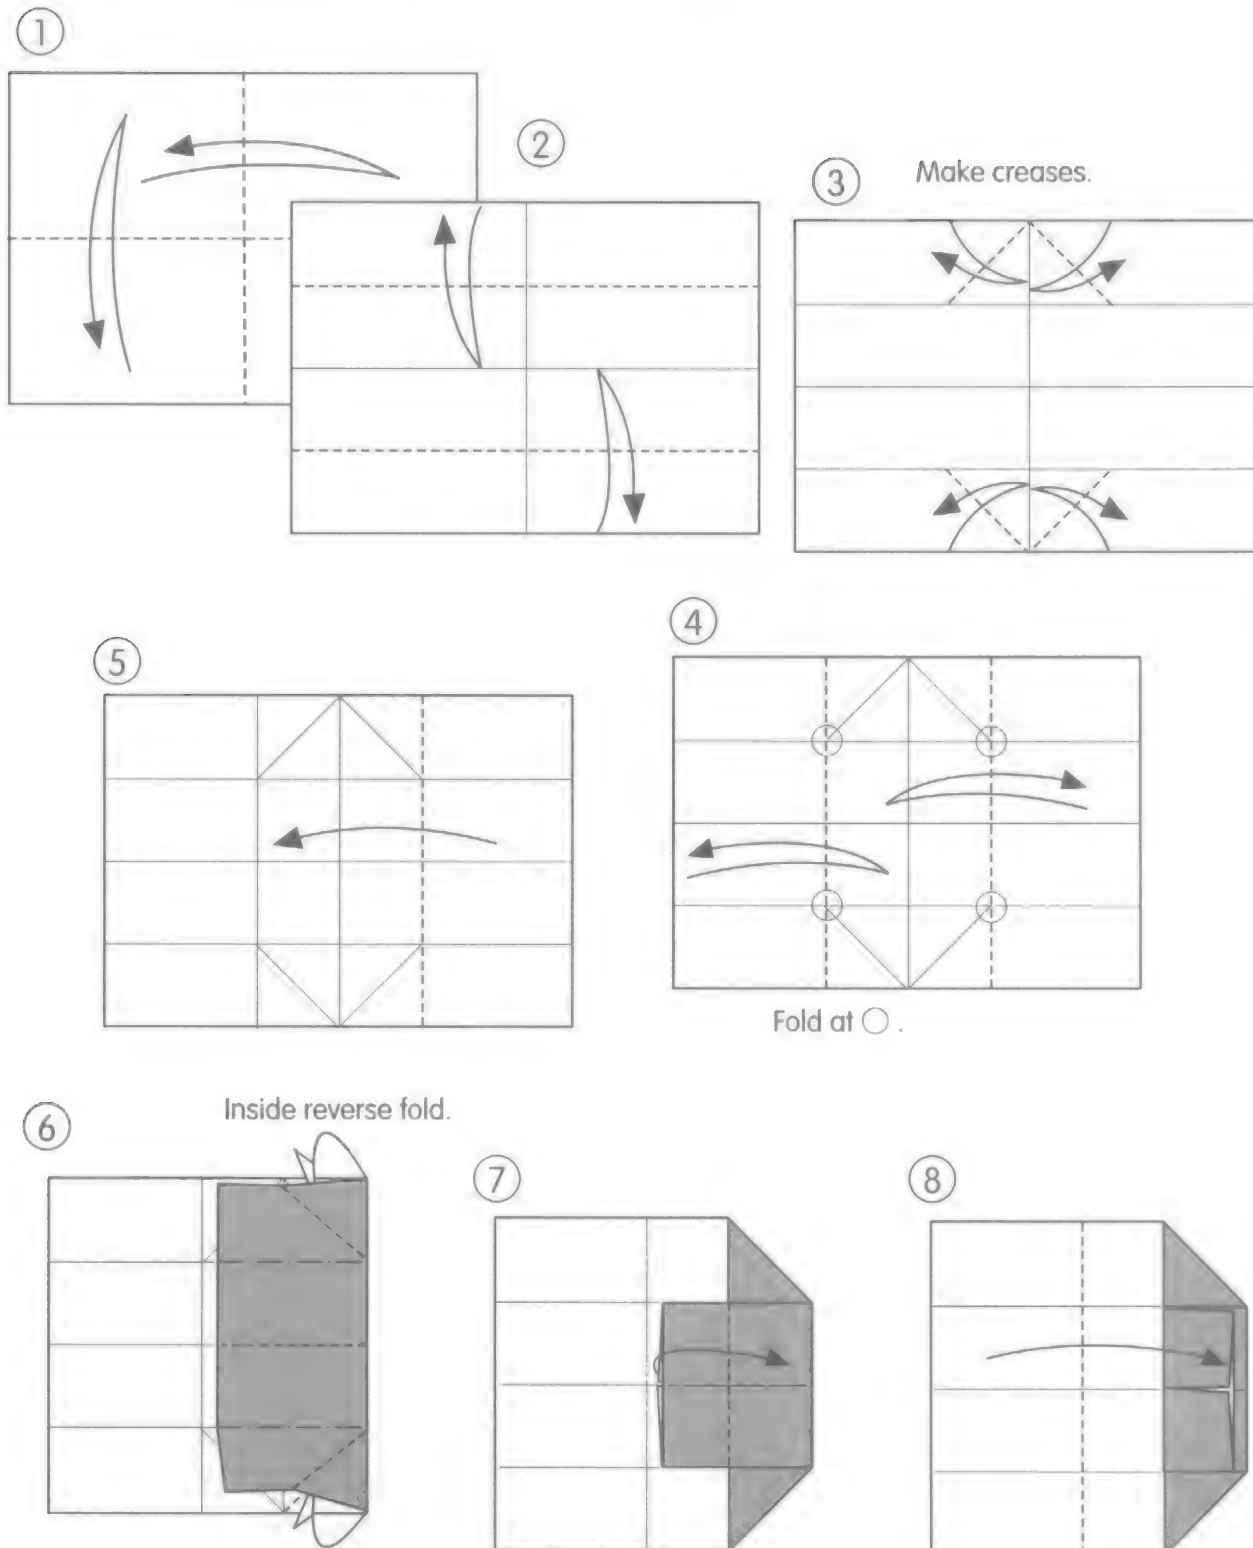

Card 2

(Pictured on page 10)

Appropriate paper size:
21 x 30 cm (8 1/2 x 12") or
18 x 26 cm (7 x 10")

When opened, the inside suddenly comes out pop. You will find the opening mechanics interesting.

⑨ Inside reverse fold.

⑩

⑪ Insert into pockets.

⑫

Pull out . The inside will come out pop.

Card 3

(Pictured on pages 8~9)

This card has many uses. Fix the card with a variety of stoppers to represent the season and events.

To begin with, you had better practice folding this card, using 21 cm x 30 cm (8 1/2 x 12") paper.

①

②

③

④

(Process of folding)

Push down ▽ and fold according to the creases.

⑤

(Process of folding)

⑥

Insert into the pocket.

◆ To ensure easy opening and closing ◆

Step ⑥. When the paper is thick, it is hard to insert the tips. In that case, fold the paper, leaving a little space along the top edge.

Fold, leaving a little space along the top edge.

Following steps are the same from step ③ on the left page.

A stopper of crane (see page 38)

A stopper of heart (see page 44)

Insert a stopper between the slits.

Open like step ⑥ when inserting the stopper.

Stoppers Crane & Iris

(Pictured on page 9)

Stoppers for Letter holder 5. Impressions change according to different stoppers. When 21 x 30 cm (8 1/2 x 12") paper is used for the card, use 7.5 x 7.5 cm (3 x 3") square paper for the stoppers.

Make creases.

Fold according to the creases.

Make creases.

[Balloon Base]

Open the pocket and squash.

Fold down.

[Another method of folding Balloon Base]

Form ④ on the left page is called 'Balloon Base.' Here is another folding method, which is traditional.

[How to fix]

◆ Crane ◆

◆ Iris ◆

Fix the iris in the same way as the crane.

Stopper Carnation

(Pictured on page 9)

This card is good for Mother's Day.

①

②

Pleat.

③

Cut zigzag edges with pinking shears.

④

Make creases.

⑤

Push down ▽ and fold both sides together.

Write your message on the surface.

⑥

Open the petals.

⑦

Fix the flower as those on the left page.

Stoppers Peach & Church

(Pictured on page 9)

'Peach' is suitable for someone's birthday and 'church' for Christmas. Both are applications of traditional origami.

◆ Church ◆

⑧'

⑨'

⑩'

⑪'

Fix them as those on page 40.

⑪

◆ Peach ◆

⑧

⑨

⑩

Stopper Heart

(Pictured on page 8)

①

②

④

③

⑤

Open the upper layer and squash ▲.

⑥

Bring down the upper layer and fold both sides.

⑦

Fold the back in the same way.

⑧

You can fix two hearts together.

⑧ of Card 3 (page 37)

Put the heart on the card.

⑫

Fold the back in the same way.

⑨

⑩

Inside reverse fold.

⑪

Turn over.

Stopper Sailboat

(Pictured on page 9)

⑧ of Card 3 (page 37)

Steps ⑥ ~ ⑧ are called 'Sink folding.'

⑦ (Process of folding)

Dent the middle.

⑧ (Process of folding)

⑨

Pleat.

Unfold.

Make inside reverse folds twice.

⑬

A Source of Energy

There is a great difference in origami devotee's ages. Enthusiastic adult origami lovers bend all their energies to origami.

They like to teach and be taught. They give joy to other people and derive joy from what they do. When they meet difficulty in the process of folding, they have to deal with it by themselves or with the help of others. When the difficulty is cleared up, they are satisfied. 'I see,' they will say to themselves, and they feel something run through their body. It will be a kind of hormone. It will relieve you and bring a smile to your face. When you completed a superb work, something like that hormone spread through your body and a contented smile will break over your face.

Most of the origami does not require a lot of time to fold, though it depends on the work. In the course of folding this and that, the hormone exudes slowly. A little exudation of the hormone per day (not necessarily every day) will be good for the health. This will become a source of your energy.

Chapter 2

For Use and Decoration

Adventure with various pieces of paper

----- The joy of using and decorating

This chapter introduces such articles useful for our daily life as chopstick cases, coasters, and vase covers. One of the delights of origami is to make use of the folded works for practical and decorative purposes.

The material of origami is paper, so we can easily handle it. If you choose different paper, you can obtain different effect. Try to use a variety of paper, sometimes boldly choosing loud one and sometimes quiet one as the case may be.

Chopstick Case with a Crane

(Pictured on page 11)

This chopstick with a crane is suitable for a ceremonial occasion. The appropriate size of paper is 15 x 15 cm (6 x 6").

Fold in numerical order.

9 Cut as far as ▽ to make the head.

Turn back and fold.

Chopstick Case with a Butterfly

(Pictured on page 11)

The appropriate paper size is 15 x 15 cm (6 x 6").

①

②

Fold in numerical order.

③

Make creases on the upper layer.

④

⑨

⑧

Pleat.

⑤

⑥

⑦

Fold the upper layer and adjust the shape of the butterfly.

Chopstick Rest of a Fan

(Pictured on page 11)

The appropriate paper size is 7.5 x 7.5 cm (3 x 3").

Pleat.

Coaster of a Picture Frame

(Pictured on page 18)

Insert another paper in the 'Picture Frame' to make a coaster. It is so simple that you can make a lot of coasters easily. Put your idea into the work and arrange a delightful party.

① ◆ Picture Frame ◆

②

③

◆ Inner Plate ◆

⑥

[Picture Frame]

⑤ (Process of folding)

④

Fold along the creases.

You can insert your illustration or a photograph.

Flower Vase Cover 1

(Pictured on pages 12~13)

When arranging flowers in a glass, you can put a cover on it. Select paper and make an elegant cover like this. You had better practice folding by using 21 x 30 cm (8 1/2 x 12") paper, before deciding the size and height of the cover. The method is simple and you will be familiar with it.

If you use large nonflammable paper, you can apply it to a lampshade.

The mouth is a pentagon.

⑩

Gradually make a cylindrical form and stick the dark area with a double-sticktape.

⑨

Fold along the creases to make a cylinder with an uneven surface.

The dark area is for sticking.

⑦

Make creases in the same way as the preceding steps.

⑧

Cut off the edge and make creases as shown.

The Size and Shape of Paper

The height and mouth shape of 'Vase Cover 1 and 2' become different according to paper sizes. As shown below, the number of triangles is equivalent to the number of sides of the mouth. If the sides of the mouth of 'Vase Cover 1' are more than seven, the surface becomes smoother, so three to six are appropriate number. If you lengthen the (h) below, you can make the vase cover higher.

Flower Vase Cover 2

(Pictured on page 13)

This vase cover is composed of lines folded at an angle of 60 degrees. First, practice folding with 21 x 30 cm (8 1/2 x 12") paper.

Make creases on color side.

- ⑧ You may leave it for sticking without cutting.

- ⑨ Fold along the creases and make a cylinder with an uneven surface.

The dark area is for sticking.

In this case, the mouth has four sides.

⑪

Covers with three sides.

⑩

Gradually make a cylindrical form and stick the dark area with a double-sticktape.

If the mouth has more than five sides, the surface becomes less uneven, so three or four sides are proper for 'Vase Cover 2.' (Refer to page 56)

Flower Vase Cover with Spring-like Bottom

(Pictured on page 13)

The vase has pleats as if it is compressed from above. You can make as many pleats as you like. It is also possible to make the pleats in the middle.

First, practice folding with 21 x 30 cm (8 1/2 x 12") paper.

①

Make a crease about 1 cm away from the edge to mark the area for sticking.

②

Make creases to divide the paper into four equal parts.

③

Make a crease as shown.

④

⑤

Fold at Δ .

⑥

Make a crease as shown.

Continued on the next page.

Fold the area for sticking.

Unfold the area after making creases as shown.

Make creases as shown.

Make valley folds on the area for sticking.

Make a cylinder with four sides by sticking the edges with a double-sticktape.

Press and dent ▼ and make pleats one by one from the bottom.

The second pleat.

Variations of Spring-like Cover

◆ A ◆ Increase the number of pleats.

◆ B ◆ Increase the number of pleats.

◆ C ◆ Make pleats in the middle.

Spiral Flower Vase Cover

(Pictured on page 13)

It will be wonderful to use this vase as an objet d'art instead of flower vase cover. Once you mastered the folding method, try to make a vase of your own, adjusting the size and height, as you desire.

First, practice folding with 21 x 30 cm (8 1/2 x 12") paper.

Make a crease about 1 cm away from the edge to mark the area for sticking.

Make creases as shown.

Make creases as shown.

⑩

Gradually make a cylindrical form and stick the edges with a double-sticktape.

⑦ Cut the paper in the shape of a rhombus.

⑨

⑧

Fold along the creases to make a cylinder with an uneven surface.

V-shape Chopstick Rest

(Pictured on page 11)

The method of this chopstick rest will be useful for preparing 'HANA' on page 66 and 'Balalaika' on page 69.

You can make a proper size of rest from 6 x 6 cm (2 1/2 x 2 1/2") paper.

Make a diagonal crease by mountain and valley folds.

Make 1/2 creases in between.

Fold two sides up and fold the whole in half.

(The first pleat)

A large inside reverse fold.

HANA

(Pictured on page 21)

①

This is an abstract flower.

The method of 'V-Shape Chopstick Rest' on page 64 is applied to the four corners.

Practice with 15 x 15 cm (6 x 6") paper. When you are accustomed to this method, double the pleats and make them thinner as shown in the box on the right page. The work will become more gorgeous. Even when using large paper, thinner pleats look better.

②

③

Make creases as shown.

④

Make creases as shown.

⑤

Pinch the four corners and raise the center square like a table.

[Pleats are doubled]

Hold sides crosswise as shown and gradually open, changing the hold.

⑨

⑧

Pleat the other parts in the same way.

Pleat the center along the creases and sink.

⑥

⑦

Pleat.

The Idea and Joy of Origami

I released this 'HANA' in a magazine long ago. Four years after the publication, I gave an exhibition of my own works at the Ueda-sozo hall and taught this 'HANA' at the class. I told the students that it would be possible to make 'HANA' with five and six sides besides the four-side one. One of the students then surprised me by telling me that she had already made beautiful 'HANA' with five, six and eight sides. I was surprised again when I received the photographs of the works that had been sent several days later.

They were original 'HANA' layered with different sizes of paper. They were unimaginably beautiful. The idea and joy of origami are thus limitless.

HANA with four layers

The pleat is doubled. (Box on page 67)

The sizes of paper: 24 cm (9 1/2"), 21 cm (8 1/4"), 18 cm (7"), 15 cm (6")

Balalaika

(Pictured on page 22)

It is interesting as an objet d'art.

If you employ nonflammable materials, it will be used a lampshade. It will be difficult to fold the 'Balalaika' for the first time, so start with 15 x 15 cm (6 x 6") paper for practice. Later you may join the two pieces for 'Balalaika.'

◆ **Practice** ◆ 15 x 15 cm (6 x 6") paper

①

Make a diagonal crease by mountain and valley folds.

②

③

Continued on
the next page.

④ Make $\frac{1}{2}$ creases in between.

⑤

Make $\frac{1}{2}$ creases in between.

⑥

Fold two sides up and fold the whole in half.

⑦

The first pleat has been made. Continue making other pleats one by one in the same way.

⑧

All the pleats have been made.

⑨

⑧ viewed from the arrow.

Open the first left pleat right and left.

⑩

Squash the tip
▼ flat.

Pull the tip.

Squash to make a flat triangle.

[Unfolded Balalaika]

◆ Completed Balalaika ◆

'Balalaika' is made from rectangular paper that is as large as two pieces of square paper, and it is the same as two ⑭ of practice are joined. Fold flat and then open.

It may be used as an objet d'art as it is. When using as a lampshade, glue the bottom of the back to prevent the leakage of light and make a hole on top for air.

Once you have mastered the method, try to double the pleats as on the following page. When using paper larger than 30 cm (12"), it would be better to double the pleats.

Squash the second tip flat.

Squash the other tips in order.

Fold in the tip.

Practice finished.

The Beauty of Lines

You can make lines easily by 'folding.' The main constituent of origami is lines. A set of them, sometimes curved or spiraled, produces the characteristic beauty.

I think it is something that is induced or found out rather than artificially produced. That will be the reason why the model with outstanding lines seems light, though it looks complicated.

[Pleats doubled] If you double the pleats, the model looks more impressive.

Chapter 3

Twinkling Stars

The Wonder of Combination

----- What does it look like?

Some origami is intended to duplicate the shape of an object faithfully, while other traditional origami does not assume concrete shape and relies on the imagination of viewers. Mr. Seiji Nishikawa emphasized the importance of this imagination. For instance, those who do not know 'fukusuke' (a popular toy in the shape of a dwarf with a big head) will imagine a different object when they see the shape. In the case of traditional Spanish origami, 'pajalita (bow tie),' it is said that it suggests a small bird.

In this chapter, I introduced units of stars that have flat shapes. Each model is interesting respectively, but if you attach some other parts it will become gorgeous.

Here is the wonder of combination, which only unit origami has. If you use proper paper, you can make fireworks, flowers and snow crystals. Some models can be used for ornaments of Christmas and the Star Festival and as decorations and accessories of wrapper. Use your imagination.

Pentagonal Star

(Pictured on page 15)

This star consists of five units. Slight errors in folding are unavoidable, but the units will be perfectly assembled in the end.

To make a star of proper size, use 6 x 6 cm (2 1/2 x 2 1/2") paper for practice.

Fold side ● at Δ so that ● meets the corner of white triangle.

Continued on
the next page. ➡

Assemble the other three
units in the same way.

Fold the point of
the last unit.

Lift the upper flap of the first
unit and sandwich the fold in
step 5.

[Back]

Fold the tip of the last unit again
and insert into the pocket of the
first unit.

[Front]

How to fix the last unit

◆ Pentagonal Star ◆

Lift the upper flap of the first unit and sandwich the tip of the last unit.

Fold the tip of the last unit again and insert in between of the flap of the first unit.

◆ Decagonal Star ◆

Insert finger deep and lift.

Fold again and bring back to an original form.

The fixing method of the last unit of pentagonal and decagonal stars is the same.
See page 91 for fixing the decagonal star.

Accessory Part 1

(Pictured on page 15)

Insert various parts in pentagonal and decagonal stars. They look gorgeous like fireworks and flowers.

①

②

③

④

⑤

(x 5)

Pentagonal star (back) made from paper of the same size as parts.

◆ Pentagonal Star+Part 1 ◆

1

Turn over and insert flaps into the slit.

2

Try with various color paper.

Choose whichever you like as front, 6 or 7.

Attach other accessories in the same way.

5

Insert into pocket.

4

Fold so as to align edges.

3

Accessory Part 2

(Pictured on page 15)

◆ Pentagonal Star + Part 2 ◆

6

Tuck the last tip into pocket.

5

The third unit has been folded.
Fold over the tip folded before.

4

3

Fold one by one.

2

Attach other parts
in the same way.

Try with various color paper.

Accessory Part 3

(Pictured on page 15)

If you get precise measurements of parts as shown below, you can make a firm and solid star. If you use paper of $\frac{1}{4}$, it easily comes off, so a dab of glue on necessary parts will ensure firm assembly.

◆ Hexagonal Star A + Part 3 ◆

Part 3 attached to hexagonal star A (page 87).

◆ Hexagonal Star A + Part 3 + 3' ◆

Part 3 and 3' attached alternately to hexagonal star A (page 87).

◆ Pentagonal Star + Part 3 ◆

◆ Pentagonal Star + Part 3' ◆

Parts were folded from paper of $\frac{1}{4}$.

Accessory Part 4

(Pictured on page 15)

①

②

③

Fold at Δ . Bring up the bottom layer without folding.

④

⑤

Bring up the layer.

⑦

⑥

⑧

Fold at Δ . Bring up the bottom layer without folding.

⑨

Bring down the layer.

⑩

⑪

◆ Pentagonal Star + Part 4 ◆

◆ Hexagonal Star A+Part 4 ◆

Part 4 attached alternately to hexagonal star A (page 87).

Attach other parts in the same way.

Turn over and insert flaps into the slit.

⑫

⑬

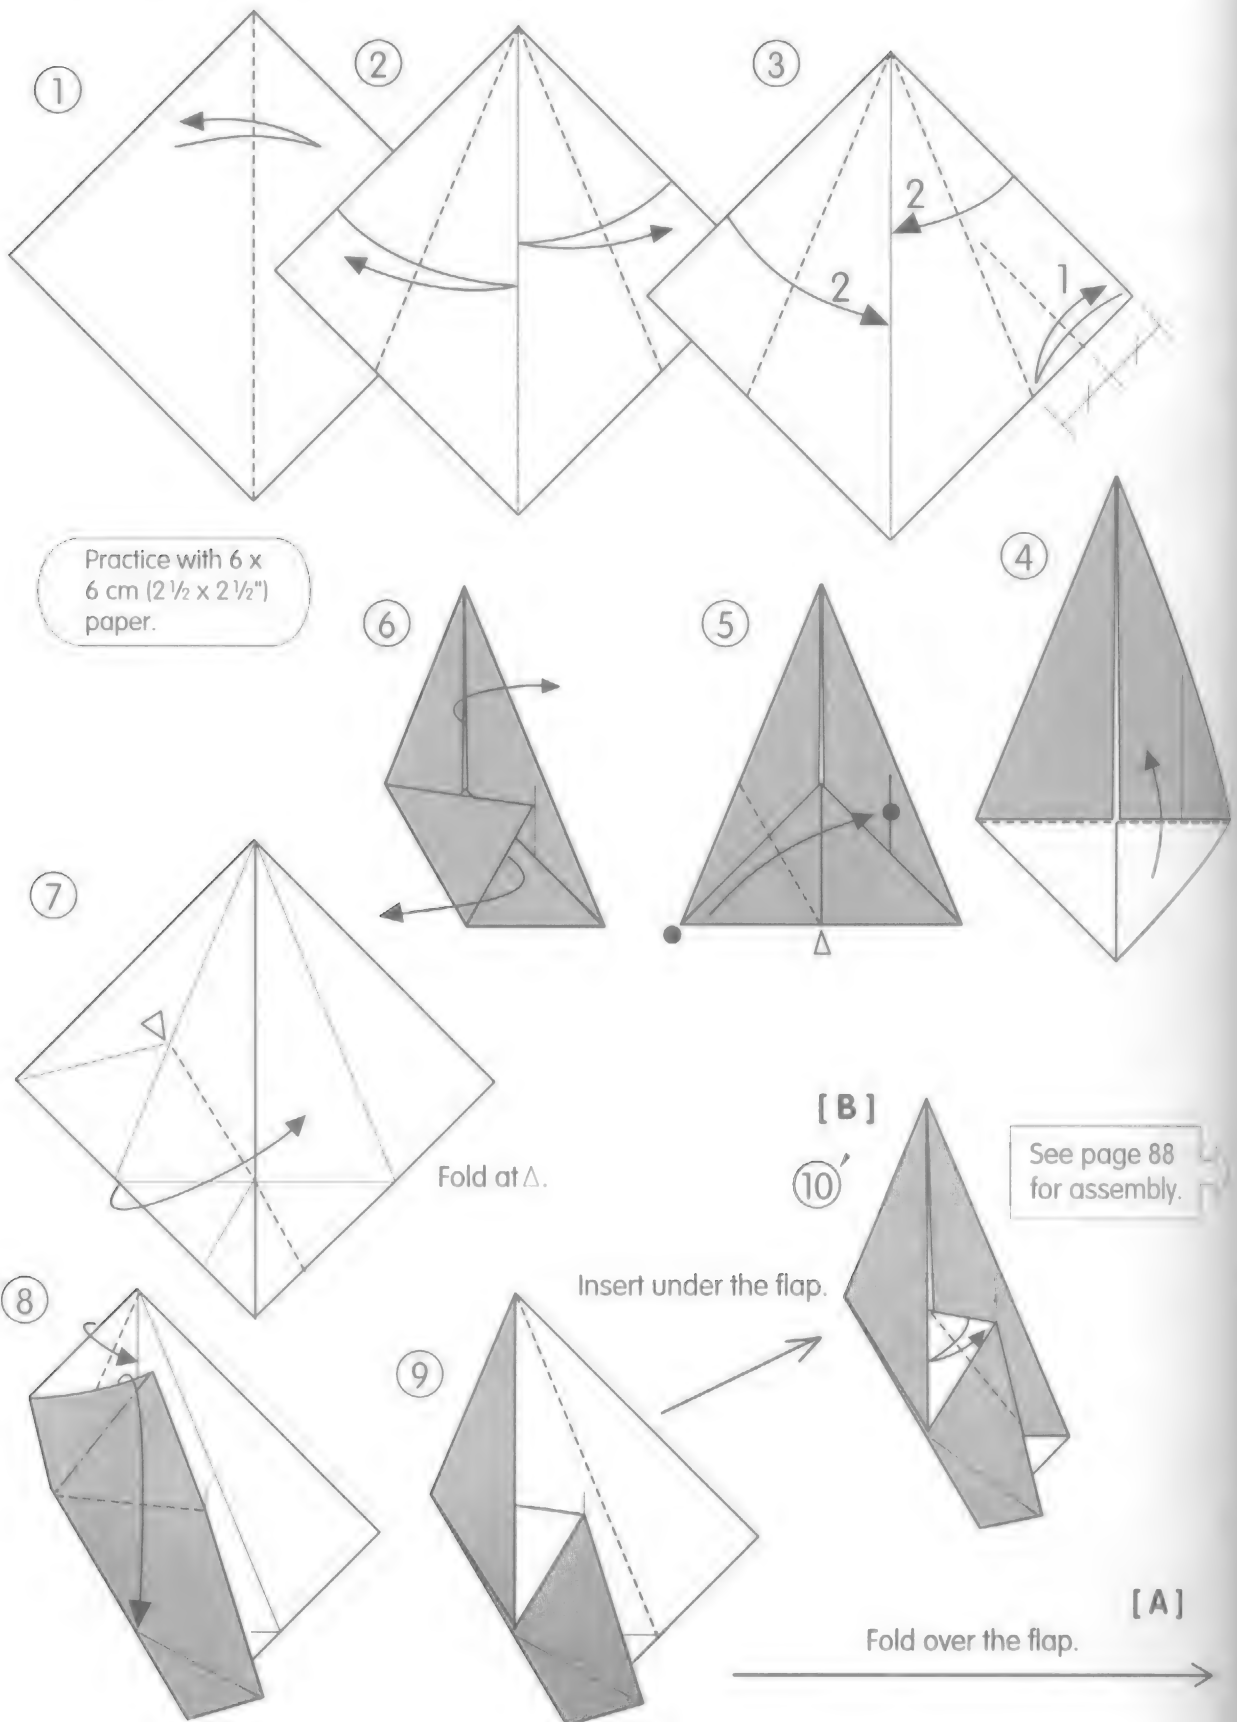

(x 5)

Pentagonal star (back) made from paper of the same size as parts.

Hexagonal Star A

(Pictured on pages 15~16)

Insert under the flap so that * meets.

Tuck the flap into pocket.
When paper is thick, the lines do not align exactly, but there is no problem.
Continue the steps.

[A]

⑩

(x 6)

[Assembly]

1

Let the other side remain unfold.

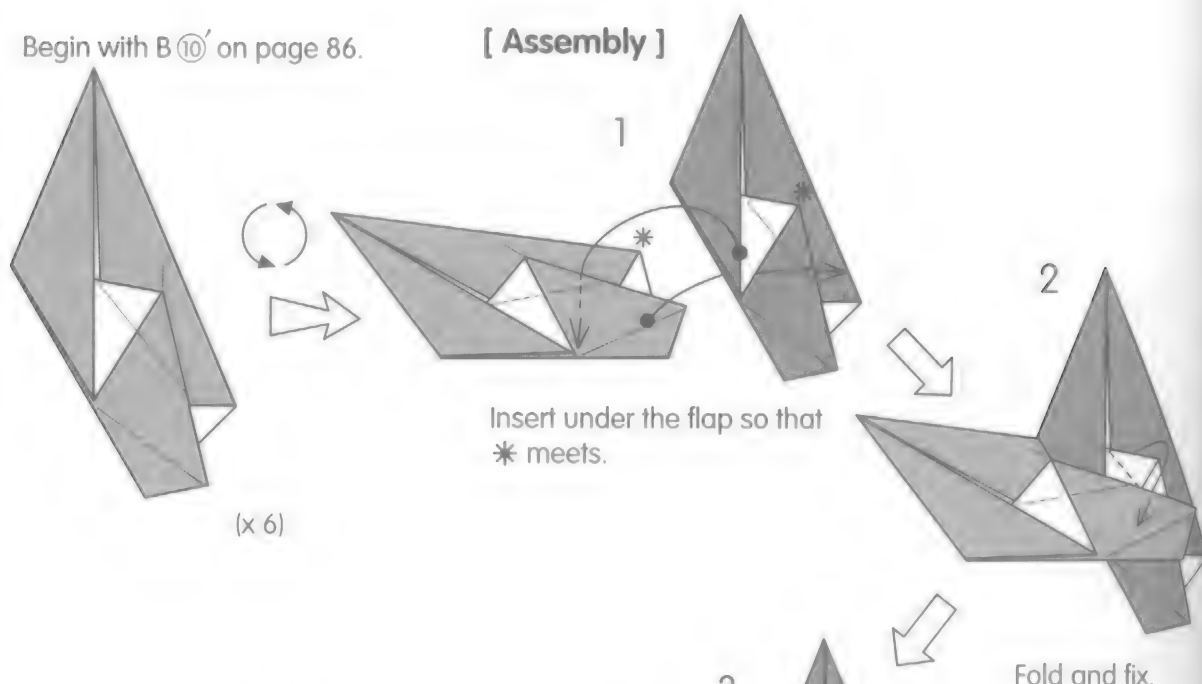

Insert under the flap so that * meets.

Hexagonal Star B

(Pictured on page 16)

Begin with B ⑩' on page 86.

[Assembly]

Assemble other five units in the same way.

As to the 'front,' you may choose whichever side you like.

[Measurement of Parts]

Fold from a square of which side is L.

Part 1
(Page 78)

Part 4
(Page 84)

See page 85 for attachment.

◆ Hexagonal Star B + Part 1 ◆

See pages 78~79 for attachment.

◆ Hexagonal Star B + Part 4 ◆

Decagonal Star A

(Pictured on page 15)

Slight errors in folding are unavoidable, but they are no problem when completed.

Practice with 6 x 6 cm (2 1/2 x 2 1/2") paper.

To lock the last unit, fold the tip as shown, pull out the other unit a little and then insert.

[Back]

[Front]

See page 77 for the details for assembly.

6

5

Assemble 10 units in the same way.

4

3

2

1

[Assembly]

Let the other side remain unfold.

The corner is folded a little.

Tuck the flap into pocket. When paper is thick, the lines do not align exactly, but there is no problem. Continue the steps.

Insert between flaps so that * meets.

[Measurement of Decagonal Star and Parts]

(Pictured on page 15)

Let's attach parts to decagonal star A. If the occasion requires, fold any corner of the unit to lock it perfectly.

Part 2 (Page 80)

Fold from paper, which is the same as the unit of star.

Fold the corner a little, just enough to insert.

See page 80 for the assembly of units.

◆ Decagonal Star A + Part 2 ◆

Part 3 (Page 82)

Fold only one flap.

See page 82 for the assembly of units.

◆ Decagonal Star A + Part 3 ◆

◆ Decagonal Star A + Part 3' ◆

Use measured parts as shown on page 82.

Folded from paper, $\frac{1}{4}$ the size of units of star.

Units of part 3 of different lengths are mixed.

Part 4 (Page 84)

①

From paper, which is the same size as the units of star.

②

Fold only one flap to insert into the slit.

③

④

◆ Basic Decagonal Star + Part 4 ◆

See page 85 for the assembly of units.

Units of different color are used.

Units are attached alternately.

Decagonal Star B

(Pictured on page 14)

Begin with step ⑪ on page 90.

It becomes 'B' or 'C', depending on the final method of locking.

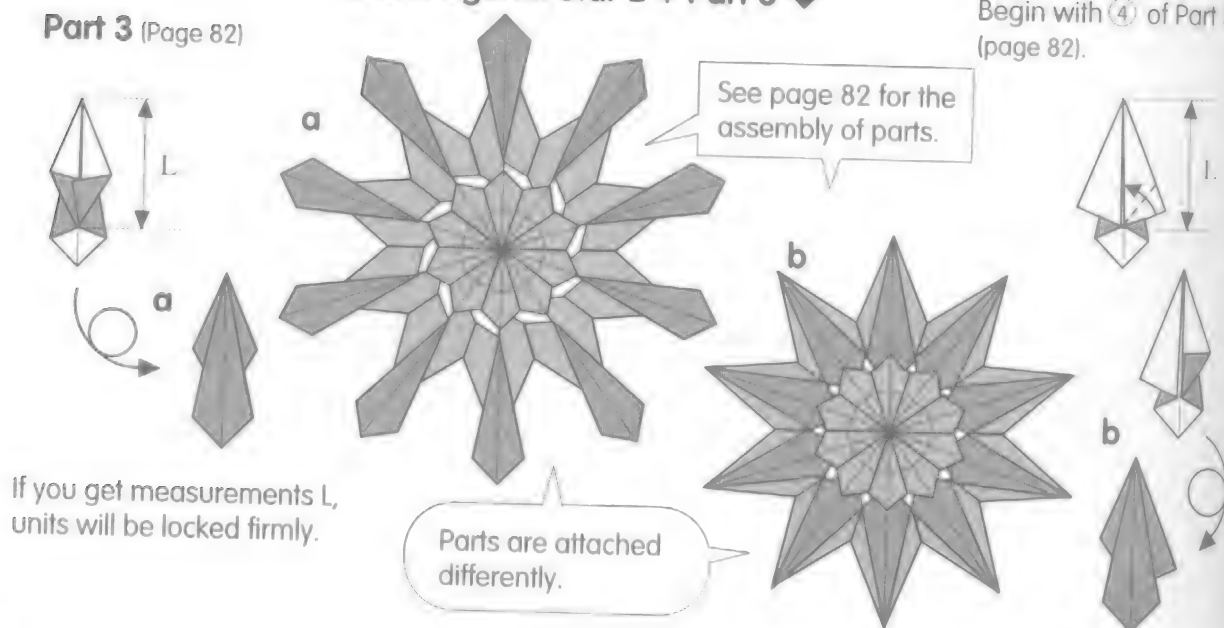

[Assembly]

◆ Decagonal Star B + Part 3 ◆

Part 3 (Page 82)

Begin with ④ of Part 3 (page 82).

Decagonal Star C

(Pictured on page 15)

Begin with step ⑪' on page 90.

[Assembly]

Insert between flaps so that * meets.

Decagonal Star D

(Pictured on page 10)

It becomes 'D' or 'E', depending on the final method of locking.
Parts may also be attached.

Begin with step ⑪' on page 90.

Inside reverse fold.

[Assembly]

Assemble 10 units in the same way.

Tuck in and lock all.

Decagonal Star E

(Pictured on pages 14~15)

Begin with step ⑪' on page 90.

Inside reverse fold.

[Assembly]

Insert between flaps so that * meets.

Lastly, insert ● under.

Being assembled.

[Center]

When the units are assembled, fold the center one by one and lock all.

Assemble 10 units in the same way.

Decagonal star with part 3 attached.
(Refer to **b** on page 94)

If you have time to spare

'Since I have retired, I have now enough time to enjoy origami at last.' I often receive such letters. In reply, I say, 'That's fine. I hope you make a good start.' 'Since I have to prepare for an entrance examination, I have no time to enjoy origami.' Sometimes I receive such letters. In reply, I say, 'It is a great asset that you have once been immersed in origami in your childhood. Sometime In your future life, the time will surely come when you can revive your origami.' My replies may sound like a counselor's advice, but I really meant what I said.

Most children love origami. They are absorbed in folding paper. They joyfully say, 'I've made it' and show the work to everyone around them. The word implies that they have made the work by their own hands and, at the same time, it shows a wonder that such an interesting thing has been produced. Among hobbies, there are few that both adults and children can enjoy with wonder on an equal footing.

If there is something urgent on you mind, you will be unable to devote yourself to origami. When it is off your mind, get to work on origami. Many people take up origami to forget what is on their mind and worries, and then they can pick themselves up again. You are busy, but if you find time to spare, try origami.

By the way, how about those who are absorbed in origami and have no time?

Chapter 4

Packages

For Practical Use and Play

----- Enjoy folding

The containers introduced in this chapter will be about the size of your palm. Since they are folded, thick paper is not suitable. It is possible to make larger containers, but they are something out of tune. Containers of origami are not strong and they can hold only light things. Accordingly, gentle handling is important.

They are intended for play rather than for practical use. They are heartwarming. That will be because the folder's intent is conveyed to the receiver.

Cake Box 1 A lid of flower

(Pictured on page 17)

The square body is covered with a dome-like lid. The lid is locked with a flower so as not to come apart.

①

②

④

③

⑤

⑥

Make creases and unfold.

⑦

⑬

Press ▼ and make a center crease.

The center is bulged.

See the next page for locking the flower on top.

⑮

Fold the other three sides in the same way.

⑫

When pinching, raise the center. The dome-like bulge will be formed.

⑪

Pinch and pleat.

⑧

⑨

⑩

◆ Knob of flower ◆

[Assembly]

[View from top]

Insert the corners
and then fold petals.

Fold again inward.

See page 104 for
the body.

Cake Box 1 Plain lid

(Pictured on page 17)

If you turn over 'flower,' you can get a plain lid.

Begin with ⑪ on page 101.

① Pinch and pleat.

Dent the center. Bulge the reverse side of 'flower.'

③ Tuck in the pocket.

Press ▲ and make a center crease.

The center is dented.

Fold the other three sides in the same way.

Cover.

Cake Box 1 Body

(Pictured on page 17)

Application of traditional 'masu' (measure).
The depth depends on the width of ④.

①

②

③

Make creases and unfold.

⑤

④

Fold only the upper layer.

The width of (a) is the side of the box.
If you change the width, you can make
nesting boxing.

⑥

⑦

⑧

◆ Bottom 1 ◆

The length of the side of the square is twice as large as (a).

Insert the inner corners of the body into these slits.

◆ Bottom 2 ◆

The size of the paper is the same as that of the body.

The length of (a) corresponds with that of the lid.
You had better fold the bottom a little smaller than the body.

Don't worry about the space in the center.

[Assembly]

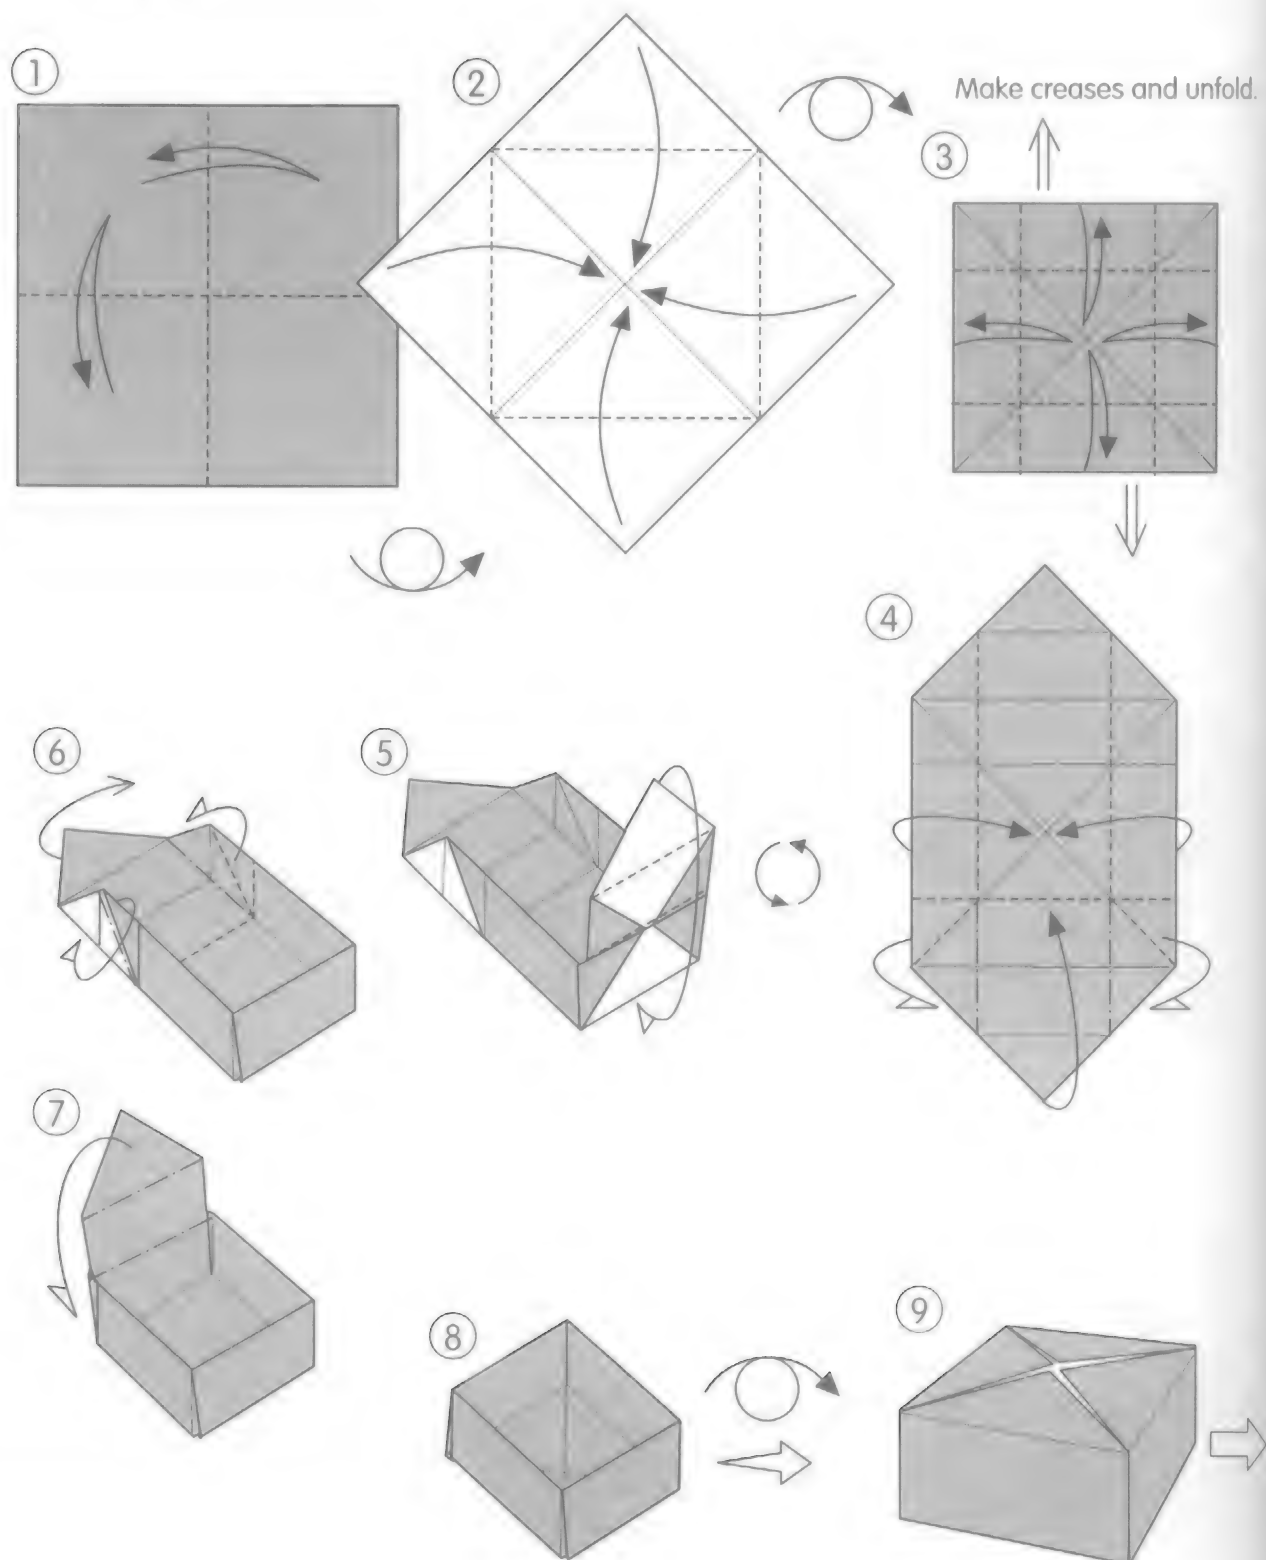

Cake Box 2

(Pictured on page 17)

Turn the traditional 'masu' (measure) inside out and make it the lid. Attach a knob of flower on top.

◆ Lid ◆

Fold in the same way as the body on page 104.

Lay the bottom.

[View from the top]

Insert the corners and then fold petals.

Fold again inward.

[Assembly]

The knob of flower (page 102)

Square Package

(Pictured on page 19)

Use 21 x 30 cm (8 1/2 x 12 ")
paper for practice.

A cylindrical package with four sides made from a piece of paper. It is good for present and putting a potpourri in it. If you use a little thicker paper, you can make a nice and sturdy package.

- ① Divide the long side into five equal parts and make mountain and valley creases.

- ② Make creases as shown.

Lay the last layer on top of another
and make a square cylinder.

Make creases as shown.

Fold inward.

Fold according to creases one by one.

Insert into
the pocket.

You may let the top as it is.

You can seal the flaps with glue.

Put something in and then twist and flatten the top.

Let stand.

Lift the flaps.

Package with Six Sides · A

(Pictured on page 19)

Use 21 x 30 cm (8 1/2 x 12 ")
paper for practice.

This package has six sides. The point is how to
fold the bottom. If you use a little thicker
paper, you can make a sturdy package,
though it depends on the size.

Divide the long side into seven
equal parts and make mountain
and valley creases.

Make two creases, making each
corner marked by ○ as your
guide.

Make creases as shown.

Make creases as shown.

Put something in and then twist and flatten the top.

⑫

Let stand.

⑬

You can seal the flaps with glue.

⑭

⑬'

Lift the flaps.

[View from the bottom]

⑪

⑩

Insert into the pocket.

⑨

Insert your hand from the direction of arrow and hold the bottom from inside to help the folding.

[The inside of the bottom]

⑦

Pleat one by one and make a cylinder.

⑧

(Process)

Pleat one by one and lay the last layer on top of another to make a cylinder.

Package with Six Sides · B

(Pictured on page 19)

A variation of Package with Six Sides · A

The gray parts show the area that comes into contact with the inside of the outer package.

Put thin paper inside.

Fold in the same way as 'A'.

Peel off the thin paper and make it look like a flower.

<Reinforce the package>

Make a cylinder with six sides from thick paper. Fix it into the package and close the top.

Make about 5 mm (1/8") smaller than the gray parts.

The cylinder with six sides.

Fix.

After the cylinder is fixed, close the top.

Dice Package

(Pictured on page 20)

Boxes of various shapes are locked with stoppers.

①

②

③

Fold only the upper layer.

④

Make a crease.

⑤

Make creases.

⑥

⑦

Unfold one layer.

Continued on the
next page. ➡

Pleat.

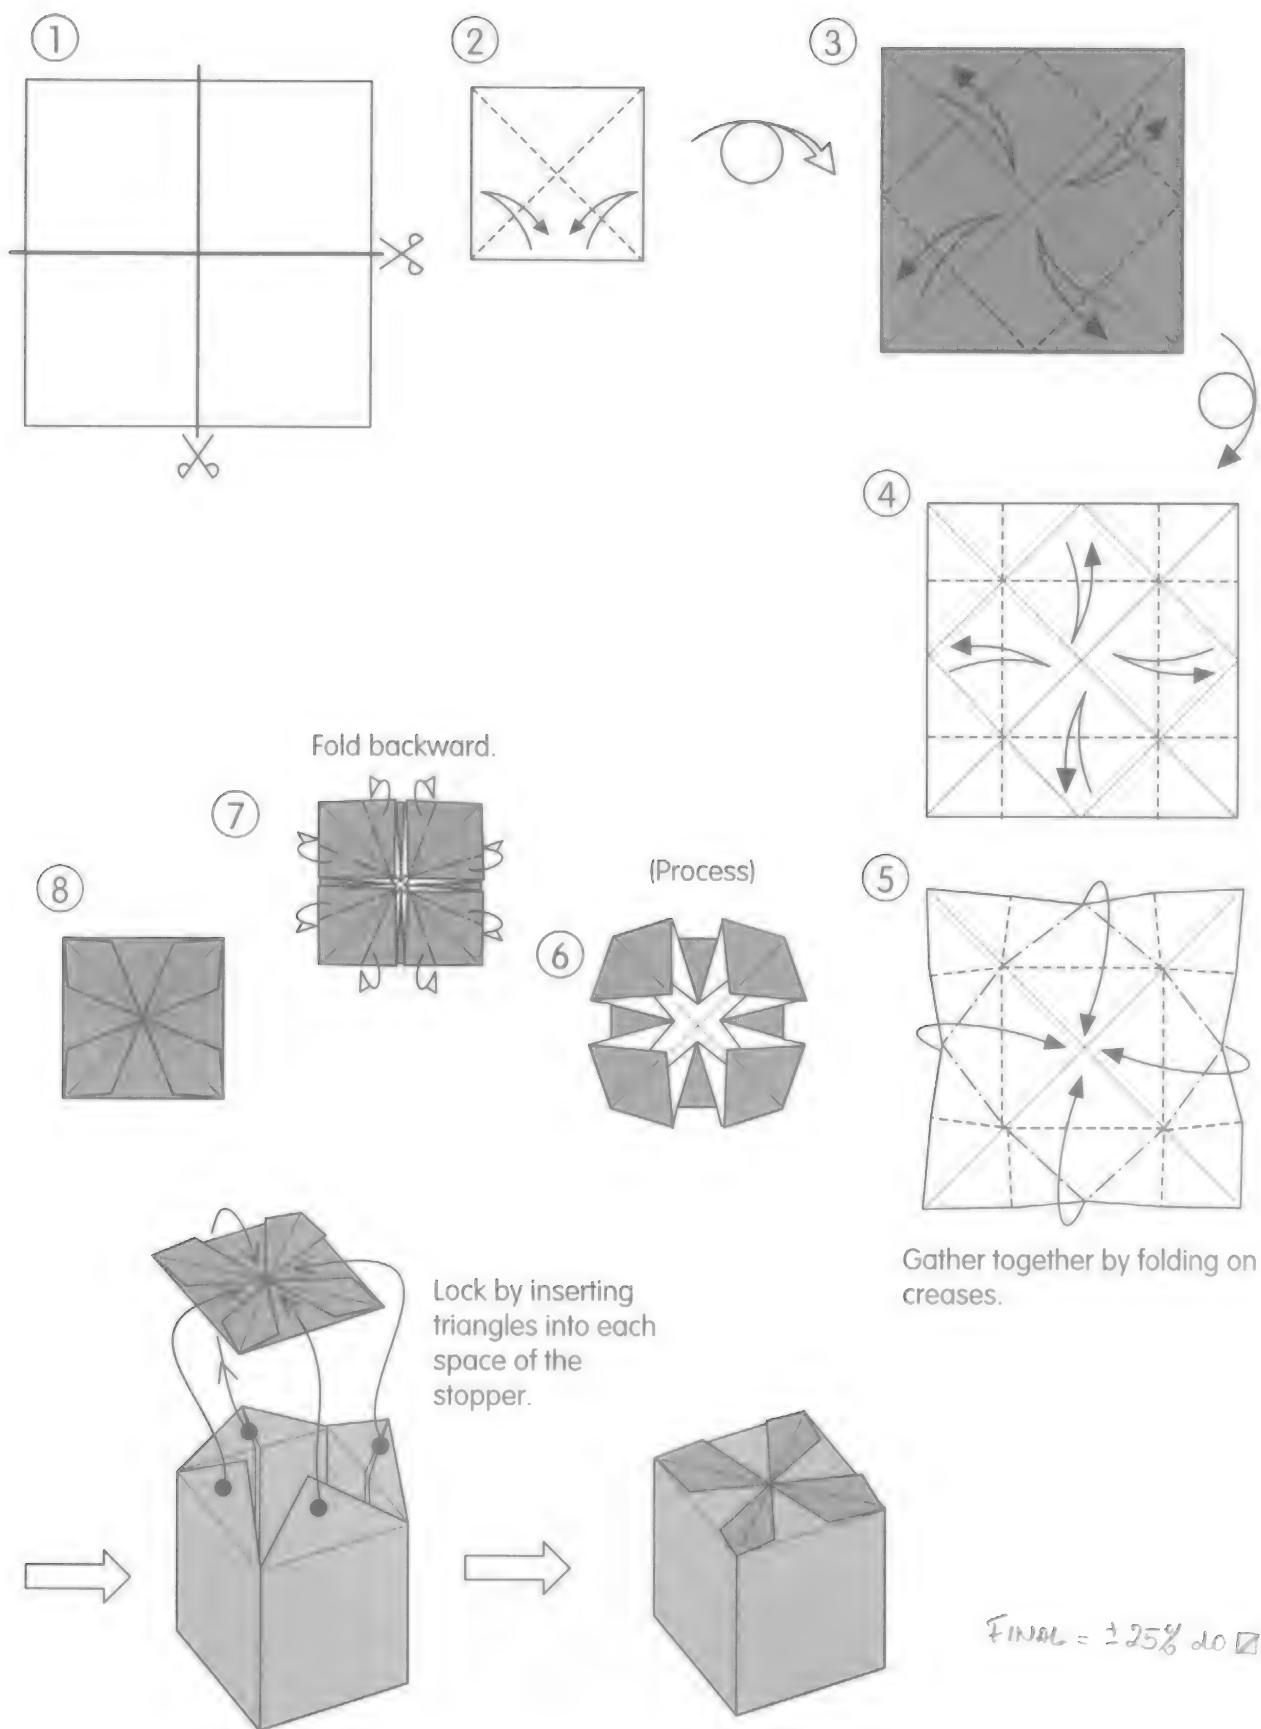

Fold as shown
and fix in position.

Fold the other three sides in
the same way.

◆ Stopper 1 ◆

◆ Stopper 2 ◆

◆ Stopper 3 ◆

Picture frame (page 53)

Open the petals one by one.

Lock by inserting triangles into each space of the stopper.

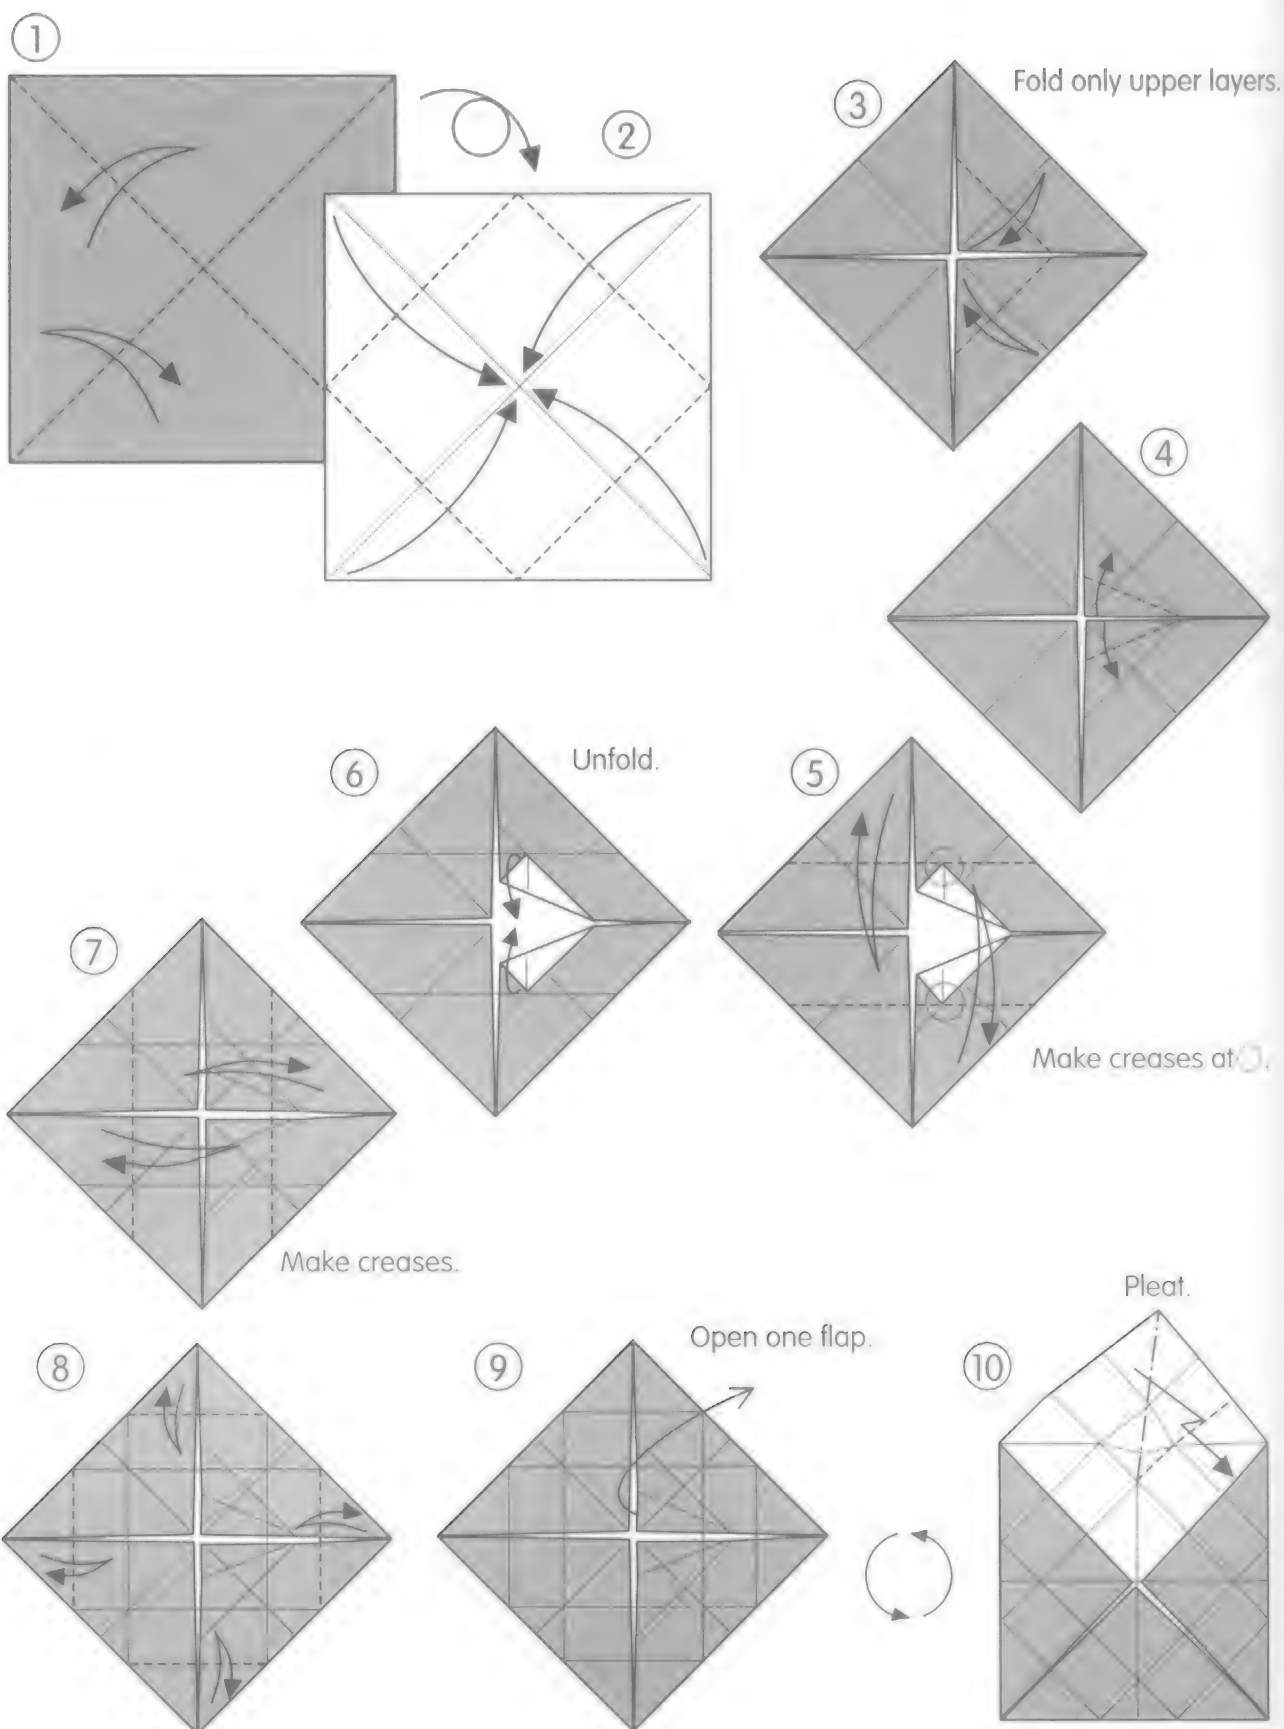

It is possible to make use of picture-frame coasters (page 53) with illustrations and photographs as stoppers.

Half-size Dice Package

(Pictured on page 20)

◆ Stopper 2 ◆

(p. 116)

[Stopper 1 made from paper, which is $\frac{1}{4}$ the size of the package]

The stopper does not necessarily fix exactly.

◆ Stopper 1 or 3 ◆

(p. 115, 117)

14

Refer to page 114 for details.

11

12

Fold as shown and fix in position.

13

Fold the other three sides in the same way.

Trapezoid Package

(Pictured on page 20)

Fold only upper layers.

Unfold.

Fold so that ● meets.

Make creases.

Fold backward.

Make creases and unfold.

◆ Stopper 1 ◆

(p.115)

Fold the other three sides in the same way.

Refer to page 114 for details.

Open one layer.

Tulip Cup

(Pictured on page 18)

A container in the shape of a tulip. It can also be used as a package.

⑬

Make creases firmly.

⑭

Unfold.

Continued on
the next page.

⑫

⑪

Make the other creases in
the same way.

⑨

Fold at \triangle so that \bullet meets.

⑩

Make the other creases
in the same way.

Double Tulip

Insert another tulip so that the petals appear alternately.

It will be interesting to curl the tips of petals.

Stopper 3 (p. 117) with a message.

Package

Make creases inside.

Stopper 1
(p. 115)

Stopper 2
(p. 116)
